The challenge: attracting high-quality, hard-to-reach developers in a saturated market

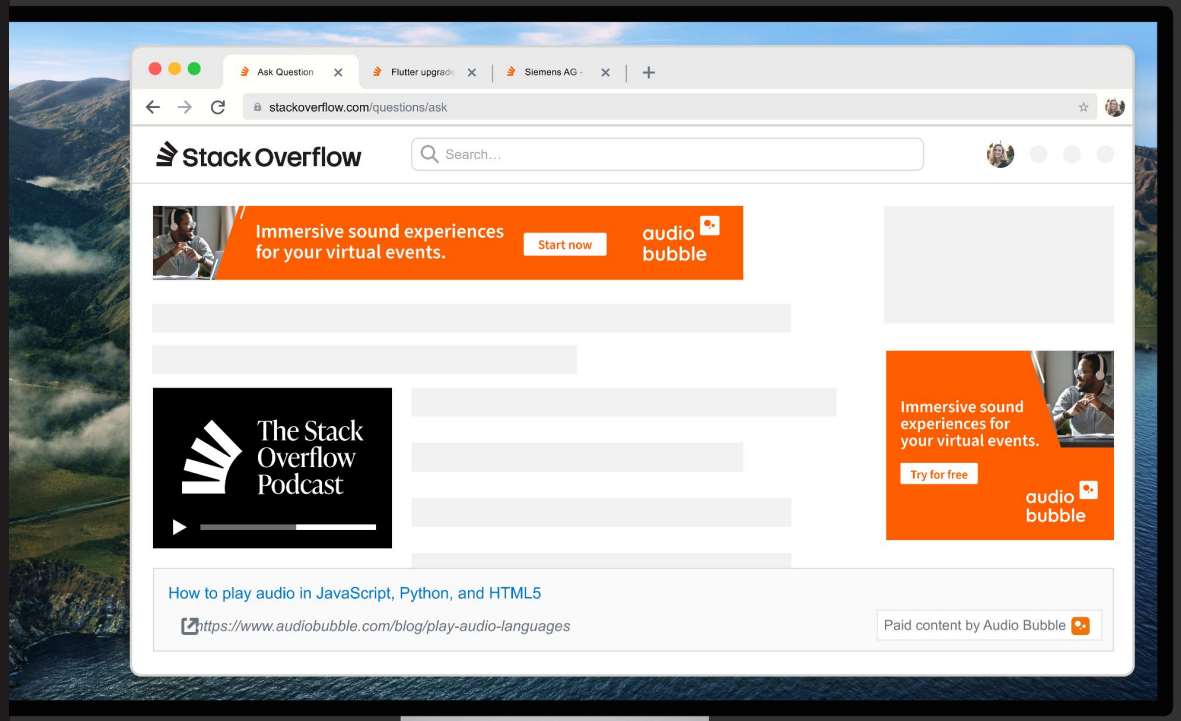
Recruiters are overwhelmed with low-quality, AI-generated resumes.

Non-tech companies struggle to appeal to developers.

Hard to justify employer branding spend without clear performance data.

Confidential & Proprietary.

Stack Ads for Talent Teams



Build a pipeline of high quality tech talent

- Find devs with the skills and experience you're looking for

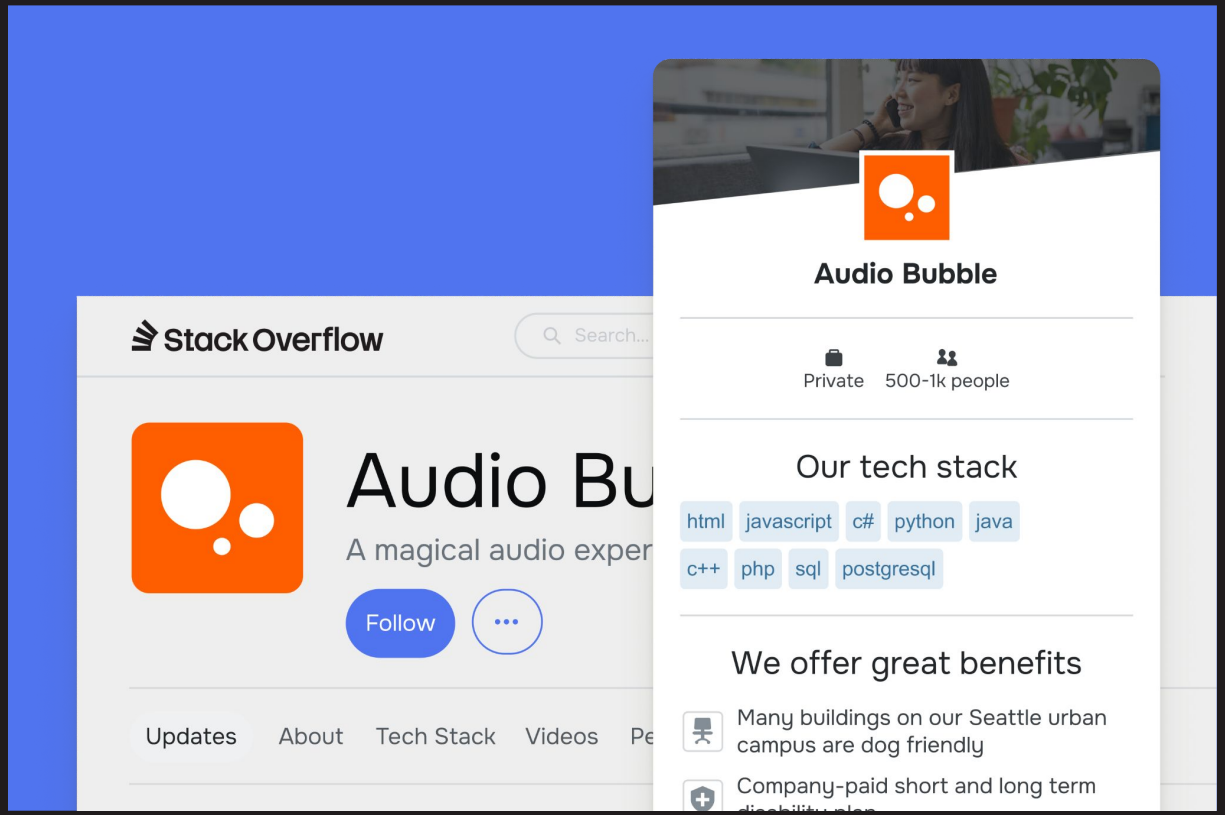
Company awareness



An essential tool to keep your candidate pipeline full.

Company Pages and Company Page Ads offer a compelling way for your company to stay top-of-mind with relevant developer and tech talent by telling your story.

- Build a community and foster employee connection
- Post links to new content on your Company Page
- Single hub for company culture, benefits, tech stack, and more

Confidential & Proprietary.

Technical Stack Exchange

Reach a broader technology audience

- All 62+ sites built and visited by passionate, technology and computing-focused professionals and enthusiasts who have a desire to learn and share knowledge.
- Over 50 million monthly unique visitors on average across public platforms, including the Tech Run of Network, who are asking and answering technical questions.
- Limited amount of visitor overlap with Stack Overflow (<1%) means this can expand your reach to a unique tech and niche-focused audience.

Sponsored Coding Challenges Details

Two Challenges, One Month Each

- Customer will get Challenge editorial guidelines regarding format, theme and topic that performs best on our site.
- Customer sends two challenge proposals to Stack Overflow in advance.
- Customer proposal(s) will then be reviewed, refined, and approved by Stack Overflow (and ultimately posted by Stack Overflow).
- *The title of the challenge must include ‘Sponsored by [client name]’’.

- **Flat Fee = $4,500**

Promotion

- Guaranteed run of network promotional banner ad impressions across Stack Overflow and technical Stack Exchange sites. Number of impressions are determined by geo the client wants to target:
  - Worldwide: 1.5M impressions
  - North America: 1M impressions
  - Europe: 1M impressions
  - APAC: 1.25M impressions
  - South America: 1.25M impressions
- Challenge header image and banner advertising creatives provided by client.
- All promotional banners for a Sponsored Challenge must include the ‘Sponsored by’’ label.

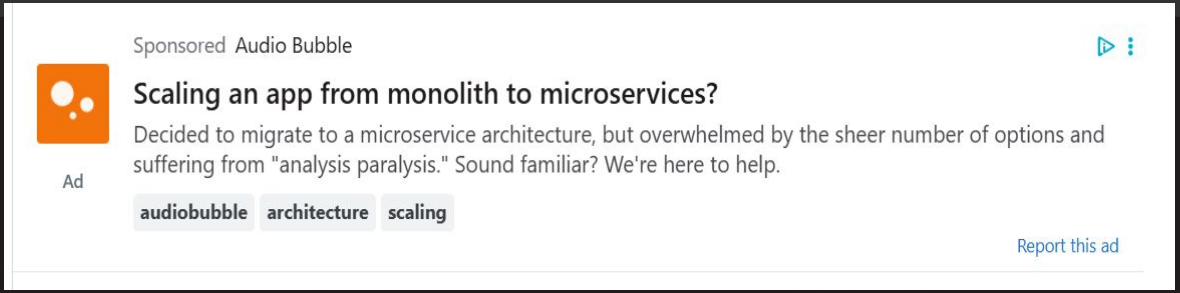
Native Ads

Native Ads on Stack Overflow and Stack Exchange put your message directly inside the developer workflow as a text-forward unit that looks and feels like it belongs in the content stream. Your ad appears between real questions and discussions, targeted by the same topic tags developers already use to navigate the site. It's integrated enough to earn attention, but clearly marked as sponsored, respecting both the audience and the platform.



CPM Cost = $19

Confidential & Proprietary.

Native Ads | Value Proposition

Reach developers where they think, work, and decide.

- Inline on list pages
- Your brand enters the flow without interrupting it

Contextual targeting built on real developer behavior

- Up to 5 topic tags
- Drive higher-quality engagement

Trust and clarity by design

- Format mirrors the site's visual language
- "Report this ad" link to maintain integrity

Same partner criteria as banner program

- Follows the same partner criteria as banner program
- Inventory stays clean, ads stay relevant, preserving developer trust.

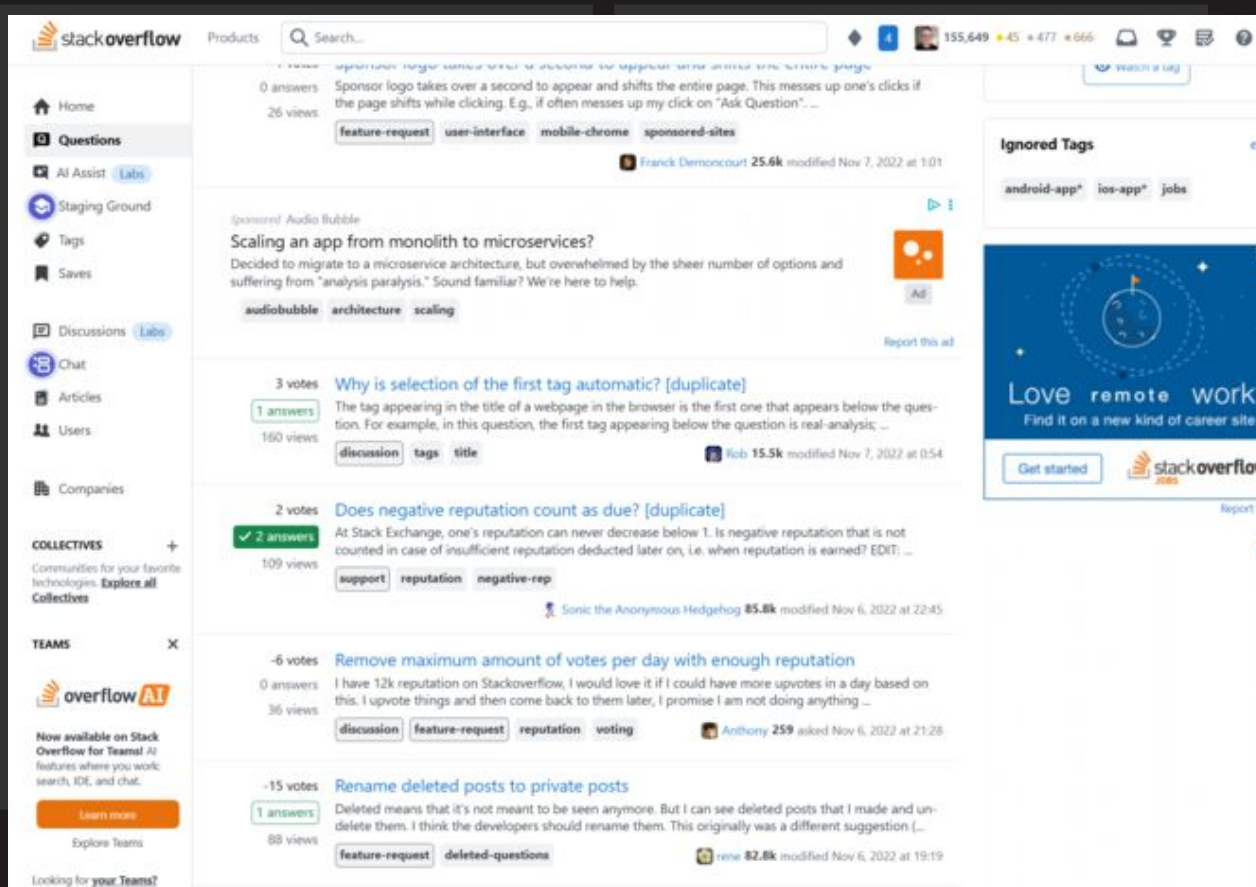
Single, focused CTA

- Each unit drives to one dedicated landing page, forcing clarity of message and tightening the conversion funnel.

Confidential & Proprietary.

Native Ads | Specs

- Headline - 50 characters or less (including spaces)
- Description - 30 words or less (or max 190 characters including spaces)
- Logo - PNG file with a transparent background. JPGs will not be accepted. Must be a 1:1 ratio.



Stack Ads on AI Assist

Reach Developers in the Moment of Problem-Solving

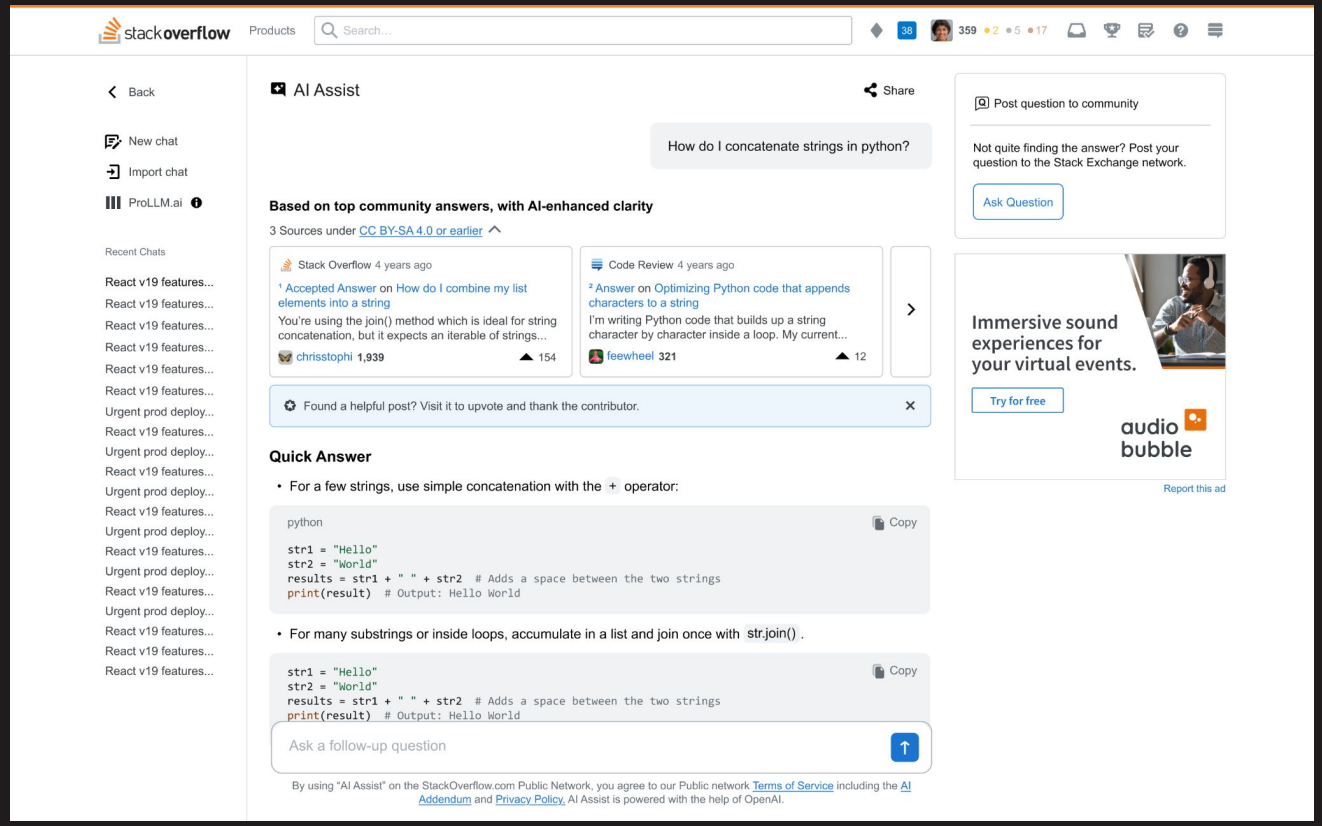
Stack Ads on AI Assist puts your message beside our AI-powered, conversational search and discovery tool that developers rely on everyday — connecting your brand to moments of curiosity, learning, and innovation.

Engage developers at peak attention

Build credibility through context

Drive measurable engagement

Extend your brand story



Stack Ads on AI Assist

Why AI Assist?

AI Assist is Stack Overflow's new AI-powered, conversational search and discovery experience — where developers go to get instant, trusted answers and learn from community-verified knowledge in the age of AI.

Stack Ads on AI Assist gives brands the opportunity to appear directly beside these high-intent, high-engagement interactions.

Ad format details

Right-rail display units: 300×250 or 300×600 pixels

Placement: Persistent alongside conversational results within the AI Assist interface

Pricing: CPM-based campaigns with volume and duration flexibility

FINN

How employer branding is helping FINN close their diversity gap with technical talent

Problem

FINN realized simply growing awareness of their brand and innovative product **isn't enough** to attract and retain technical talent while simultaneously driving Diversity, Equality & Inclusion initiatives forward in a competitive market.

Solution

Company awareness through authentic storytelling and celebrating employees on their engineering teams through employer branding.

Outcome

Following their campaigns, FINN saw an increase in brand awareness with engineer talent, maintained a consistent employer presence on Stack Overflow for recruitment efforts, and boosted their CTR (Click-Through Rate) for overall campaign improvement.
